Pathways to Literature

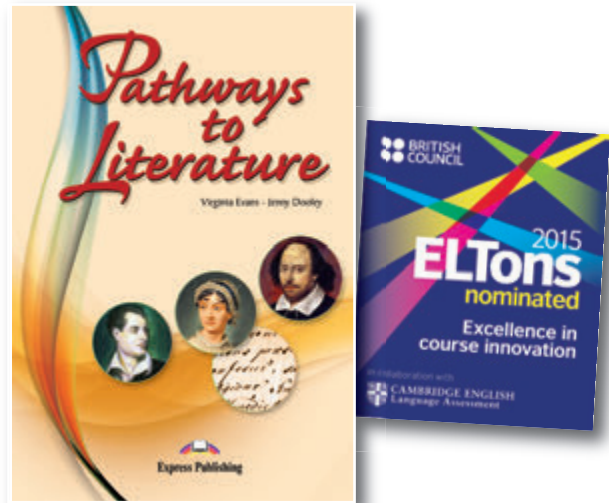

UPPER-INTERMEDIATE TO ADVANCED LEVEL

Virginia Evans – Jenny Dooley

An innovative course that aims to develop the English language through the medium of literature, ideal for B2+/C1 CEFR level students at specialized secondary schools, colleges and universities. For the first time, literature is presented through reading, listening and visualisation using captivating videos and printed resources. The well-organised syllabus, rich visuals, videos and carefully-designed tasks develop all four language skills needed by learners to master the English language. The course encourages critical thinking and teaches social and moral values while preserving the cultural heritage of the English-speaking countries.

Key Features

- The English language is taught through the single theme of the study of the canonical works of English Literature written in different time periods.
- It has a multi-media approach, with an inventive combination of video, audio and print resources.
- The special emphasis put on recognition and analysis of various literary devices helps students appreciate the emotional power, beauty and breadth of the English language.
- Extensive analysis of the title, characters, themes, setting, values, motifs, symbols, metre, rhythm, summary skills and essay writing provide a helpline to achieve mastery in the English language.
- It embraces holistic learning by exploiting tightly interwoven concepts together. Students read, listen, watch, speak and write on the same topic.

- Its cross-cultural approach allows students to experience the cultures and beliefs from various parts of the English-speaking world and raise their intellectual standards.
- Analyse sections enhance students' thinking skills.
- The listening tasks come in the form of university-style tutorials and lectures, giving students a taste of this style of teaching.
- Each unit is uniquely structured. Starting with an introduction to both the author and their literary work, it then continues to an in-depth analysis of an extract from the work. Lecture type audioscripts give students details of the complete work and help them examine the most important aspects of it. Each unit culminates in the exploration of a literary technique or feature, the knowledge of which helps students write their essay.
- Its flexible design allows it to be used either in the classroom or as a course of self-study.

sample pages from *Pathways to Literature Student's Book*

The videos are tightly linked to the content of each unit, provide context for learning, enhance students' knowledge of the literary work studied and boost learners' emotional intelligence. Video activities for each video are included in the Student's Book.

"Literature adds to reality, it does not simply describe it. It enriches the necessary competencies that daily life requires and provides; and in this respect, it irrigates the deserts that our lives have already become."

Storytime

These two series have been designed to supplement all English courses and have been graded in three key stages:

Stage 1 ● Stage 2 ● Stage 3 ●

Children will love these beautifully illustrated readers and will be motivated to explore English as a foreign language. These series enhance receptive skills by reading and listening, and also gradually introduce the development of productive skills through the accompanying activities and the production of each story as a play (optional).

The selected stories present a great variety of classic and original tales, all of which have something more to teach than the language itself. The excellent illustrations, fully dramatised audio recordings and the engaging animations stimulate learners' imaginations, while the accompanying picture dictionary items help them make the association between word and meaning.

Stage 1

Education, Learning & Training in a Digital Society

Dr George Drivas

ICT has been adopted as a means of teaching practice in most schools worldwide. Teachers are required to manage ICT and the digital realities of the 21st century with the aim not only to impart knowledge and to help students develop their skills, but also to create educational environments and teaching opportunities that will exploit the potential of and benefit from the use of ICT.

This book aims to familiarise teachers with the new ICT classroom environment so that they can educate students effectively and cultivate their ability to deepen the knowledge acquired and to adapt it to their own personal, social and professional settings.
