# Storytime – Christmastime

The Storytime and Christmastime series have been designed to supplement all courses and motivate learners to explore English as a foreign language. Both series enhance receptive skills through reading and listening, but also gradually introduce the development of productive skills through the accompanying activities and the production of each story as a play (optional).

The stories present a great variety of classic and original tales, all of which have something more to teach than the language itself.

The illustrations, the fully-dramatised audio recordings and the engaging animations stimulate learners' imaginations, while the accompanying picture dictionary items help them make the association between word and meaning.

The Pupil's Book contains an Activities section and scripts for the play; also included is an Activation Code to download the digital material (offline cross-platform digital application).

The Teacher's Edition includes the Pupil's Book, directions for the staging of each story as a play, tips on how to make the props and costumes easily and cost-effectively, as well as drama activities which can be used before each rehearsal so as to prepare learners for the wonderful world of drama. The Teacher's Edition also includes an Activation Code to download the offline cross-platform digital application.

MYRSINI VERDOUKAS - JENNY DOOLEY

*My Edutainment World* is a holistic approach to teaching the English alphabet and life skills to preschoolers. It provides a hands-on curriculum to teachers who teach English as a second language to children aged 4-6.

Pupils are exposed to the English language and the phonetic sounds of the alphabet through play and involvement in fun and creative activities in an informal and enjoyable way. In other words, children are subconsciously acquiring language through entertainment and engagement.

The activities have been specifically designed to focus on developing pupils socially, physically, intellectually, creatively and emotionally.

# **English for 21st Century Skills**

SOPHIA MAVRIDI & DANIEL XERRI

The potential to generate innovative ideas, solve problems and implement solutions needs education systems that support people in developing the competencies, skills and values to live and work in a globalised, inclusive and interconnected world. While digital technologies can provide people with unparalleled opportunities to interact, learn and create, taking advantage of this potential requires individuals who will have the emotional and social skills to critically engage with the world around them. As language educators, we can actively contribute to this by applying English for 21st Century Skills.

This book showcases cutting-edge theory and practice in the development and integration of 21st century skills in the language classroom. Well-known ELT experts as well as teacher educators, practitioners and leaders from around the world explore how creativity, collaboration, critical thinking, inclusion, wellbeing, leadership and other key new literacies can be developed in both formal and informal learning contexts. The book brings seasoned and novice teachers, trainers, researchers and policy makers up to date with developments in this increasingly important field in language education.

# Brain Friendly Grammar Neurolanguage Coaching

RACHEL PALING

Grammar - most language learners hate it, and in fact most language teachers hate it too!

Brain Friendly Grammar enlightens language educators as to why learning grammar has been so dry and unstimulating in the past. Next, it distils neuroscience into a simple spoken coaching conversation that harnesses the ideal conditions for absorbing and retaining information. In this way grammar is discussed and explored with the learner in a quiet brain friendly conversation.

After explaining the theory behind the principles, Rachel outlines the practical applications of this knowledge before giving a detailed breakdown of areas to cover, step-by-step, so that neither coach nor learner will ever feel lost with grammar again.

This book is not a traditional grammar book and is probably very different to any other grammar book that you have read. It is really intended for language educators who already have knowledge of grammar or even for polyglots or language specialists who also have a very good grasp of the mechanical side of the language.

If you are new to teaching or coaching grammar, Rachel suggests using this particular book as the skeleton script for the grammar coaching conversations, but then use the traditional grammar books for the in-depth knowledge pertaining to the theory.

By using the versatile Neurolanguage Coaching PACT PQC model, language educators will gain more confidence and be more motivated to deliver grammar, transforming language learning into stimulated, curiosity arousing conversations that may impact learners in an extremely positive way.
